

## **About the OCALA NATIONAL FOREST ~**

*With millions of visitors each year, the Ocala National Forest encompasses 600+ square miles and is the second largest National Forest in the state of Florida. Established in 1908, it is the oldest National Forest east of the Mississippi River and the southern most National Forest in the continental U.S.*

*The Forest lies between the Ocklawaha and St. John's Rivers and contains over 600 natural lakes and ponds. The Forest is also home to four major natural springs of crystal clear water; Alexander Springs, Juniper Springs, Salt Springs, and Silver Glen Springs.*

*Native inhabitants of the forest include the Florida black bear, white-tailed deer, wild boar, coyote, gray fox, red fox, bobcat, raccoon, nine-banded armadillo, striped skunk, Virginia opossum, southeastern pocket gopher, American alligator, North American river otter, and the gopher tortoise, as well as a variety of native reptiles, amphibians and birds.*

*Water recreation is plentiful in the area. Some of the numerous lakes include; Lake Bryant, Lake Delancy, Lake Dexter, Lake Dorr, Lake George, Halfmoon Lake, Lake Kerr, Lochloosa Lake, Lake Ocklawaha, Orange Lake, Lake Weir and Lake Woodruff.*

*Other recreational opportunities include... hunting, camping, fishing, hiking, swimming, boating, horseback riding, ATV & dirt biking, canoeing, kayaking, bicycling, snorkeling, off-road vehicles, and more!*

*With so much to offer, it's no wonder the Ocala National Forest is one of the most heavily visited National Forests in the United States.*
